Ezra.

Attached is a very brief bio of myself.

1. My long term vision for Qualicum Beach is status quo. Growth be governed by the citizens of the town. I believe we really need to ensure we keep our jewel attractive to all walks of life.

2. I'm a firm believer in doing things right. Green spaces and eco systems are areas we need to keep. Enhancing these spaces requires careful considerations and impact studies prior to proceeding with any adjustments.

3. I have no preconceived ideas of getting along with specific members of council. Councils are a strategic part of the Canadian Political infrastructure and need to perform professionally, strategically and listen to its citizens.

4. I love animals and without their habitats they no longer have the ability to exist as they had. I'm just amazed when new species of animals and plants are found. I am also an active member in the North Island Wildlife Recovery Association.

5. This is a no brainer. The Beach and all the wildlife. Our climate also helps!

6. Unfortunately I cant make any promises at this time as I will be only one vote.

7. Same as question 6

8. No

9. All donations will be disclosed a per Election BC laws. 90 days after election day.

10. Definitely a question I cannot comment on at this time.

11. Watersheds are governed by strict rules and regulations ever since Walkerton Ontario. Safe Potable water is a great concern of mine.

12. Sorry can't comment at this time. Need more info.

13. No comment at this time.

14. Living Document.

15. Affordable Housing for young and old. Balance.

Thankyou for the opportunity to reply to your questions. I'm a firm believer that special organizations are an important and integral part of the fabric of any community.

Cheers.  
Brian Denbigh
