1. Long-term vision for Qualicum Beach: to have continued social & economic prosperity, to continually be proactive in addressing climate change, continued adherence to the waterfront master plan (see vision statement for the QB waterfront), continued high standards in our community for the quality of life for current residents & future generations. And actually fulfilling the 2019-2022 Strategic Plan would be good.
2. Re: Greenspaces & ecosystems: in new developments besides having green initiatives, percentage of property to be designated greenspace (associated with positive mental health). Definitely save old growth trees as they provide greater aesthetic appeal & emotional benefits, as well as exponentially higher ecosystem services like air filters, cooling & CO2 removal. Staying abreast of your suggestions & current world news.
3. Your ask as to a preferred councillor to work with: I am committed to respectful collaboration & open communication with everyone.
4. Why nature is important: it provides the essentials for our existence & survival!
5. My favourite natural feature in QB & why: the boulevard of trees planted on Memorial Avenue. Over 25 years ago upon driving into QB it was so impressive & special to see these little saplings being planted. They continue to grow endearingly strong & beautiful and that transfers over to how I want our community to be. I am appreciative & proud to call Qualicum Beach my home
6. Re: enacting on Tree & Vegetation Bylaw within first 90 days-depends
7. Re: code of conduct with financial penalties-is that legal??
8. Have I accepted donations from a developer with a current application-no
9. Average donation amount -campaign not finished yet, still accepting
10. & 11. Re: Do I support developer proposals-depends
12. Support the current construction activities in the Laburnum wetlands-no
13. Bike trail support-depends
14. the Official Community Plan - a policy document
15. Agreement with OCP that we should prohibit urban sprawl into our rural lands & instead utilize densification to meet our housing needs-yes

Dear Ezra, thank you for your questionnaire. Your concerns & ideas are always welcome. Best regards, Jean Young ✓
